about

studio taschide is a German design office which is run by Sandra Tan and Johannes Schiebe. The two designers have successfully been cooperating since 2004. The products designed by them are given more than just a nice outer shape. The designs of ‚taschide‘ address the observers on an emotional level and arouse their curiosity. Their approach is it to find a harmony between the functional needs and the sensual look of a product.

This brochure shows a selected overview of their work.
